

INDICIUS

## OVERVIEW

INDICIUS Scripted Export is used to transfer data captured using Recognition, Correction and Completion into databases, knowledge management systems or other repositories. Scripted Export can combine captured data with data from other ODBC source prior to export, and can format the data to any specification using its in-built scripting control.

INDICIUS Stats Reporter provides a complete and accurate view of system performance, allowing system administrators to identify dips in recognition accuracy or keying throughput that might compromise the effectiveness of the capture system as a whole. Statistics can be measured over a batch of documents, over a set time period, per operator or per group of operators.

## SCRIPTED EXPORT

### Features

- ◆ Export object library supporting: ODBC, ASCII text file, e-mail
- ◆ Scripted control of output data format
- ◆ Data export at document or batch level
- ◆ Merging of export data with other data sources prior to export
- ◆ Object library support for e-mail alerts based on business rules
- ◆ Collation of system performance stats for viewing in Stats Reporter

### Benefits

- ◆ Scripted Export allows complete control to be exercised over output data format
- ◆ Data can be exported to legacy databases and bespoke systems
- ◆ Sample scripts are provided
- ◆ Data formatting scripts can be developed rapidly using Scripted Export

### Usage

#### Formatting of captured data & exporting of data and images to external data stores

Input: Captured data & document images  
Output: Formatted data & document images

#### Formatting of system performance statistics

Input: Raw performance statistics  
Output: Formatted performance statistics

### Platforms

Kofax Ascent Capture  
Captive InputAccel  
FileNET Panagon Capture  
Microsoft Windows NT/2000/XP

# INDICIUS

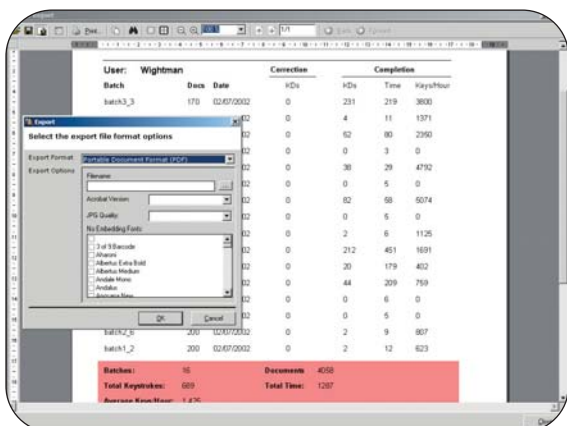

## STATS REPORTER

### Features

- ◆ Collation and viewing of recognition performance and keying throughput statistics
- ◆ Viewing on-screen or in hard copy
- ◆ Export of statistical data to file: ASCII text, Microsoft Excel, Adobe PDF, HTML, TIFF Image
- ◆ Standard or custom reports

### Benefits

- ◆ Stats Reporter provides complete flexibility in statistical content and report layout
- ◆ New report layouts can be developed rapidly using a powerful drag-and-drop report designer
- ◆ Statistics can be combined with data from any other ODBC source

### Usage

For collation and viewing of data capture system performance statistics

Input: Formatted performance statistics

Output: Statistics report

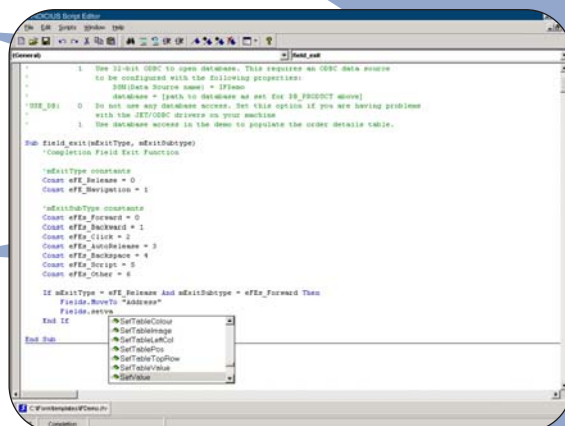

### Platforms

Kofax Ascent Capture

Captiva InputAccel

FileNET Panagon Capture

Microsoft Windows NT/2000/XP

## SCRIPT EDITOR

### Features & Benefits

- ◆ Rapid development of data formatting scripts
- ◆ Auto-completion of keywords and script functions
- ◆ Context-sensitive help
- ◆ Syntax colour-coding

### Usage

For development of data formatting scripts for Scripted Export \*

Input: None

Output: Script file

### Platforms

Kofax Ascent Capture

Captiva InputAccel

FileNET Panagon Capture

Microsoft Windows NT/2000/XP

\* Can also be used to develop validation scripts for Recognition, Correction & Completion
