IBM Content Manager V7.1 to V8.2 Upgrade Offering

Fixed Price Smooth Start Upgrade Offering – only £12,000

Deliverables of this Smooth Start Upgrade Offering

Task 1 – Conduct an on-site survey.

The objective of this task is to identify and document the existing Content Manager 7.1 configuration and system architecture.

Task 2 – Document specific Upgrade process.

The objective of this task is to analyse the site survey report, identify and document in the form of a ‘Scope of Work’ the most appropriate Content Manager upgrade process taking into account the existing application and system constraints.

Task 3 – Prepare one (1) physical file system environment for Content Manager 8.2.

The objective of this task is to prepare and install the target server environment necessary to install one (1) Content Manager 8.2 server.

Task 4 – Install one (1) Content Manager 8.2 for Windows or AIX Servers.

The objective of this task is to install one (1) Content Manager 8.2 Sever for multiplatforms on a Windows or AIX Server.

Task 5 – Install one (1) Content Manager 8.2 Windows Client.

The purpose of this task is to install a single Content Manager 8.2 Windows Client.

Task 6 – Perform prerequisite upgrade tests on target Content Manager 8.2 Server.

The objective of this task is to verify all system prerequisites required for the upgrade have been met and to prepare the upgrade environment.

Task 7 – Perform the Content Manager 7.1 to Content Manager 8.2 upgrade.

The purpose of this task is to perform the upgrade of documents from existing Content Manager 7.1 to the new Content Manager 8.2 instance.

Task 8 – Perform post upgrade cleanup tasks.

The objective of this task is to verify that a successful upgrade took place, and that the data from the Content Manager 7.1 system is available for viewing by the Content Manager 8.2 system.

Note: The price of £12,000 is ‘per/each Content Manager server upgrade, (some customers have more than one environment),

e-ASL will invoice your company £12,000 plus VAT per upgraded server at completion of the implementation, plus actual costs of expenses such as travel, accommodation, and per diem.
