

Accounts Payable, Image and Workflow Fixed Price Smooth Start Offering

Accounts Payable Imaging Solution

Accounts payable procedures and service level management can be a challenge for companies with increasing invoice transactions and complexity. To address these challenges many companies are utilising Accounts Payable image capture and workflow solutions to assist with accounts processing, coordination, payment, tracking, and long term archive and retrieval.

Accounts Payable image and workflow processing provides faster access to the invoices, enabling the transfer of the invoice between staff for approval, also enabling the processing of invoices from multiple offices, immediately, providing service level tracking and on-line escalation tools.

Key questions your organisation maybe considering:

- o Does your company suffer large costs and time reconciling invoices and purchase orders?
- o Does your company struggle to achieve accounts payable service level commitments?
- o Does your company suffer from the overhead cost of invoice storage and retrieval to comply with customer queries, audit and legal guidelines?
- o Is your company looking for solutions to reduce the risk of compliance and audit exposures?
- o Does your company have a central view and easy access to filed accounts records?
- o Does your company have a backup process and solution of customer invoices and files to protect against possible loss, fire or flood?

This out of the box Accounts Payable Smooth Start offering includes:

Easy and Fast processing of purchase orders and invoices.

Improved Audit Control of the Accounts Payable processes to comply with compliance requirements.

Reduced Costs of the Accounts Payable department administration.

Secure web access to view invoices to provide real time access of invoices to branches, customers and suppliers.

Low Cost Backup and disaster recovery of your companies Accounts Payable filing systems.

Immediate access to invoices to assist with GL reconciliation.
