

Imaging Audit, Tuning, and Scanning Services

£4,000 Fixed Price Smooth Start Offering – One Month On Site

e-ASL On Site Image Capture Specialists, Only £4,000 per calendar month.

e-ASL help make image scanning processes and procedures easier, faster, smoother, and more accurate with our fixed price £4,000 audit and imaging smooth start offering.

e-ASL provide on site imaging Specialist Capture Services, to assist our existing customers to further set up and tune scanning operations, including the end to end scanning processes.

Our Specialists assist your scanning staff with the complete image capture process, from document preparation right through to the scanned document storage within your central image repository.

Our Specialists offer assistance to enhance your scanning staffs understanding and management of the complete image capture cycle, from image scanning quality, index verification and validation, amending errors, data entry and document release.

- o Do you want to speed up the volume of daily page scanning within your business?
- o Do you want an extra set of hands to help backfile capture your business documents for a month?
- o Do you want an affordable capture service offering to assist your staff to learn the scanning process? (teach the teacher strategy).
- o Do you want to audit your scanning operation, and review ideas to improve your image capture accuracy, to reduce capture costs, and to improve capture quality?

The e-ASL Image Capture Specialist Smooth Start offering includes:

Technical Audit and Findings

e-ASL provide an audit document of up to three capture processes, plus hardware, software and scanning recommendations for your consideration.

Throughout the calendar month's scanning service e-ASL will also:

Develop and document image capture preparation processes for your business requirements.

Implement capture processes and procedures to enhance the image capture and indexed data entry.

Assist with tuning of the scanning processes to further enhance and maximise the quality, volume and speed of image capture.

Provide one calendar months on site scanning assistance to help your staff to backfile capture documents.
