

Kofax Ascent Software Upgrade

Fixed Price Smooth Start Offering for only £2,000

e-ASL's 'fixed price' Kofax upgrade smooth start service provides a low risk and low cost upgrade path from Kofax V4x/V5x to V6.

By upgrading to Kofax Ascent V6 companies can be confident that the Kofax Ascent system will be formally supported by Kofax, and can gain significant product enhancement benefits from the latest product features and functions.

The following is included within this 'fixed price' smooth start offering:

- o e-ASL will conduct an on-site survey to identify systems architecture and pre-requisite compliance.
- o From the analysis of the on-site survey e-ASL will document your company's specific upgrade process.
- o e-ASL will perform the Kofax Ascent Capture Version 6 upgrade process.
- o e-ASL will perform a system test and application handover.
- o e-ASL will provide an end to end technical upgrade

Key benefits from upgrading to Kofax Ascent Version 6

Key new features including:

- Just one dongle for the whole system, no longer needs hardware dongles,
- Optimised for enterprise wide usage, enables central system as well as remote sites
- Build more complex capture processes
- Extensions to recognition
- PDF rendering
- Improved user interface

Compliance with Kofax's upgrade recommendations and strategy, ensuring a supported product path.

Robust low risk and speedy upgrade to Kofax Version 6. No need for technical education investment.

'Fixed Price Offering' reducing financial worries of scope creep, knowing the end result and end price.

No Hidden Costs!

Kofax Ascent Software Upgrade

Fixed Price Smooth Start Offering for only £2,000

Deliverables of this Smooth Start Upgrade:

Task 1 – Conduct an on-site survey.

The objective of this task is to identify and document the existing Kofax Ascent Capture installation and system architecture.

Task 2 – Document specific upgrade process.

The objective of this task is to analyse the site survey report, identify and document in the form of a 'Scope of Work' the most appropriate Kofax Ascent Capture Upgrade process taking into account the batch classes and system constraints.

Task 3 – Backup existing Kofax Ascent Capture system.

The objective of this task is to backup the existing Kofax Ascent Capture system including batch class definitions and the Ascent Capture database.

Task 4 – Upgrade Kofax Ascent Capture server / standalone system.

The objective of this task is to upgrade one (1) existing Kofax Ascent Capture server or standalone system to version 6.

Task 5 – Upgrade Kofax Ascent Capture Client

The purpose of this task is to upgrade a single Kofax Ascent Capture Client.

Task 6 – Perform post upgrade testing.

The objective of this task is to verify that a successful upgrade has been achieved and image capture can re-commence.

Kofax Ascent Software Upgrade – Conditions.

1. Customers must have legal entitlement of Kofax Ascent Capture version 6 before the 'Fixed Price' Smooth Start service can commence. The cost of Kofax Ascent Capture licences are outside of this offering but e-ASL are happy to provide prices.
2. The e-ASL £2,000 Smooth Start offering is for each/per Kofax Ascent Capture system.
3. Prices are exclusive of VAT and personal expenses such as travel and accommodation will be recovered at cost.

Note: The price of £2,000 is per/each Kofax server system upgrade with up to ten (10) Scan or Workstations (some customers have more than one environment). Offer excludes Kofax licence charges and costs.

e-ASL will invoice your company £2,000 plus VAT per upgraded system at completion of the implementation, plus actual costs of expenses such as travel, accommodation, and per diem.
